

## VAM Face Mask Policy

Effective October 19, 2020, face masks or coverings are required in VAM facilities. Non-medical masks, scarves, and cloth may all be used, with a limited number of disposable masks available at the front desk during office hours for those who do not have one. The following are exempt from this requirement:

- Children under 5 years of age
- Anyone with an underlying medical condition which inhibits the use of a face mask or covering, or unable to apply/remove a mask or face covering without assistance

Masks may be temporarily removed if the occupant is engaging in an activity that is not possible when the face is covered (in which case a combination of distancing and physical barriers will be arranged), is the only occupant in a room, and/or is an employee working in a space not designated for public access. Additional class- or studio-specific face mask policies may apply; ask your teacher for more information.

This policy will be implemented and enforced in 'good faith' to primarily educate people on wearing masks or face coverings and promote their use in enclosed spaces. Proof is not required for anyone listed as exempt from this policy.
